MFP 275-D

Firefly diesel powered fire fighting pump is one of the lightest & most efficient portable fire fighting pump available in its class today. It can be stowed in equipment lockers of fire tender very easily. Although the pump is designed for fire fighting purposes it can still be used for various other applications like de-watering, booster tank filling, washing etc. The pump components are made from light aluminum alloy which are further heat treated & hard anodized for increased strength & life. The pump has a strong wrap around steel cradle with four collapsible handles.
